

FY 2020-2021

Consolidated Budget Recommendation

Alabama Commission
on Higher Education

ALABAMA COMMISSION ON HIGHER EDUCATION

CONSOLIDATED BUDGET RECOMMENDATION
FOR FISCAL YEAR 2020-2021

"..... The Commission shall receive, evaluate and coordinate budget requests for the public institutions of higher education of this state, shall hold open hearings on the budget requests of the separate institutions and shall present to each institution and to the Governor and the Legislature, a single unified budget report containing budget recommendations for separate appropriations to each of the institutions. The consolidated budget and analysis of the Commission shall be accompanied by the original requests and their justifications as submitted by each institution. The recommendations of the commission shall be derived directly from its assessment of the actual funding needs of each of the universities, as presented to it by the presidents, which assessment may include, but shall not be limited to, derived conclusions that may be based upon standard techniques of objective measurement, need and unit cost figures arrived at through the use of comparative and verified data secured from the various institutions, applied in an impartial and objective manner, and comparison shall be made not only between similar functions of institutions in Alabama but also between Alabama institutions and similar functions of institutions located in other states, provided that nothing herein shall be construed to prohibit any institutions of higher education in this state from submitting any matter pertaining to the financial operation and needs of said institution to the Legislature or to the Governor at any time."

Ala. Code §16-5-9(b) (1975)

SECTION A

FY 2020-2021 CONSOLIDATED BUDGET RECOMMENDATION

by

THE ALABAMA COMMISSION ON HIGHER EDUCATION

**Consolidated Budget Recommendation
By The Alabama Commission on Higher Education**

As prescribed by Section 16-5-9(b) of the Code of Alabama, the Alabama Commission on Higher Education has evaluated the budgets submitted by the senior public institutions of higher education and by the Chancellor of the community and technical colleges. At the Commission meeting on December 6, 2019, the Commission reached two sets of higher education funding recommendations for Fiscal Year 2020-2021.

The first recommendation, identified as the FY 2020-2021 Alabama Commission on Higher Education (ACHE) Funding Standard, (column 2 of the Executive Summary table, pages A-4 & A-5) is a statement of the Commission's estimate of the basic financial requirements that should be provided to support the institutions and their programs if Alabama higher education is to provide regionally competitive education to its citizens. The second recommendation, identified as the FY 2020-2021 Recommendation, (column 8 of the Executive Summary table on pages A-4 & A-5) provides an overall appropriation increase of almost six percent (5.87%) from the Education Trust Fund (ETF) for public colleges and universities.

The Commission recommends a funding level of \$1,644,156,960 for all public colleges and universities. The recommendation is based on the following:

- 1) Fund a rate increase for mandated PEEHIP retirees' health insurance for public senior institutions who do not participate in PEEHIP (all except AAMU, Athens, and JSU).
- 2) Peer Comparison Adjustments were made to institutions found to be receiving less in state funding than their statistical peers. The National Center for Higher Education Management Systems (NCHEMS) was contracted by ACHE in 2018 to develop a set of statistical peers for each Alabama public institution. Alabama institutions found to be supported at less than 90% of the \$perFTE peer average were given an adjustment to address the significant variance. The adjustment seeks to address the underfunding variance over a number of years and should, over time, help contain rising costs in tuition.

After the above items are funded, then the Commission recommends that funds be appropriated so that all institutions receive a five percent (5%) increase over the amount appropriated for FY 2019-2020. Statewide lines were recommended for varying amounts.

Alabama Commission on Higher Education (ACHE) Funding Standard

The ACHE Funding Standard is based on the following (see Section C for a more detailed explanation of the ACHE Funding Standard):

- (1) The institutional Academic Programs, or "O&M," amounts are the products of the Commission's funding formulas for academic programs.
- (2) Facilities renewal needs are based on the Commission's formula for estimating facilities renewal allowances and backlogs. The Commission continues to endorse treatment of major capital needs for the institutions via processes ancillary to the regular appropriations bill.
- (3) Necessary funds required to provide the employer's matching share of FICA and TRSA are included at levels expended the previous year.

Modified Funding Recommendations

Historic difficulties in proposing a Consolidated Budget Recommendation for higher education in Alabama are magnified by the necessity to complete the recommendation process before firm projections are made of ETF revenues and problems in resolving the gap between institutional needs and available state resources. Once again, the Commission has struggled to provide a viable recommendation within the confines of expected ETF revenues.

The Commission also includes recommendations for other lines not directly associated with a public college or university (column 8 of the Executive Summary table on page A-4). The amount of new money being recommended for these state level lines is \$29,954,775.

This brings the total increase in new funds needed for the recommendation to \$121,147,172 or an increase of almost seven percent (6.80%). The total amount recommended for higher education from the Education Trust Fund is \$1,903,123,496

(column 8 of the Executive Summary table on page A-4).

Additional information on prior years appropriations and institutional and agency requests can be found in Section B.

It is important to note that the Commission on Higher Education continues to seek a balance between legitimate institutional needs, as reflected in the construction of the ACHE standard, and the historic gap in actual appropriations. The Commission believes that the distribution incorporated in this Consolidated Budget Recommendation is one of many required steps to improve higher education funding in Alabama.

Notes:

1) FY 2019-20 appropriation included \$5 million from the Higher Education Equalization Fund, \$4,783,132 for the universities and \$216,868 for the two-year institutions.
 2) AAMU includes FY 2019-20 allocation of \$1,226,181 for the Agricultural Research & Extension State match. Additional funds are included in the line for the Alabama Agricultural Land Grant Alliance (AALGA) allocation. The total FY 2019-20 amount allocated is \$347,9596.

3) This column contains funds for rate increases for the TRS retirement rate and the rate increase for mandated PEEHIP retirees' health insurance for public 4-year institutions who do not participate in PEEHIP. There was no projected increase in the PEEHIP rate or the TRS current employee rate for FY 2020-2021. Rates subject to change due to legislative action.

Retirees in PEEHIP from the October 2019 count have been increased approximately 2% from FY 2019-2020 for a rate of \$349. This estimate has been calculated by the Alabama Commission on Higher Education and has not been verified by PEEHIP and is subject to legislative action. The increase has been calculated using the FY 2019-2020 estimated amount supplied by the institutions.

4) ACHE contracted with the National Center for Higher Education Management Systems (NCHEMS) to select peer institutions for each Alabama public Four-Year & Two-Year college and university. NCHEMS selected peers for the Alabama institutions based on a number of factors including similarity of mission, level of instructional offering, size, and program mix. ACHE then used data on all of the peer and Alabama institutions from the National Center on Education Statistics' 2016-2017 Integrated Postsecondary Education Data Systems (IPEDS) reports.

5) Detailed information on State-Wide lines can be found on Pages B3 and B4.

SECTION C

FUNDING FORMULAS AND CONSOLIDATED BUDGET RECOMMENDATION PROCESS

This section describes the funding formulas used by the Alabama Commission on Higher Education in arriving at a statement of the level of funding required to achieve the appropriate ACHE Standard for the institutional elements of the Higher Education Budget and the processes used in the construction of the ACHE Standard for Alabama higher education funding.

Overview of ACHE Standard Formula

Formula Components:

(1) Academic Program Calculation (Senior Institutions)

Cost of Instruction

Multiplier - Unit Instructional Cost (For general studies-average regional faculty salaries divided by assumed productivity adjusted for inflation)

The multiplier times weighted Semester Credit Hours (Academic weights to reflect cost differences in program mix and instruction level) equals total cost of instruction

Instructional Related (IR) Support - 30% of estimated cost of instruction

Research Support

Doctoral Institutions - 10% of Instruction & IR Support & Sponsored Research Component

Nondoctoral Institutions - 2% of Instruction & IR Support & Sponsored Research Component

Sponsored Research - 30% of qualifying research

Public Service

Doctoral Institutions - 2% of Instruction & IR Support

Nondoctoral Institutions - 10% of Instruction & IR Support

Library Support - Actual unweighted semester hours, less military science, times cost factor

Technology Support - 15% of Instruction, IR Support & Library Support

Facilities Renewal and Replacement - Based on square footage, age and use of buildings. Total Annual Renewal Allowance calculation plus 25% of the Cumulative Renewal Allowance calculation minus the amounts for auxiliary and other space is included

Less Tuition Adjustment - 90% of weighted institutional average credit hour charge multiplied by average unweighted credit hours

Fringe Benefits - Social Security (FICA), Retirement (TRSA) and PEEHIP (Health Insurance of prior year actual expenditures—Two-Year colleges)

Agricultural Experimentation and Extension - Auburn University-prior year ACHE Standard calculation times the Consumer Price Index (CPI)

(2) Two-Year College ACHE Standard Calculations: (plus facilities renewal and fringes)

Community College – Median SREB appropriation per FTE times Average Fall FTE

Technical College - Adjusted Expense Rate times Average Fall FTE
Adjusted expense rate is based on average faculty salaries, student/faculty ratio, program support expense adjustment and tuition adjustment

EXPLANATION OF ACHE FUNDING PROCESS FOR HIGHER EDUCATION

Academic Program Formula - Universities

1. Instructional Multiplier: The calculation of the Academic Program multiplier is predicated on the estimated National Association of State Universities and Land-Grant Colleges (NASUGLC) regional General Studies average salary for doctoral and regional institutions. A multiplier is determined from regional faculty salaries adjusted by an estimated departmental expense rate. The multiplier uses an assumed faculty productivity factor of 630 student credit hours (SCH) annually for doctoral institutions and 585 SCH for nondoctoral institutions. These productivity factors imply a General Studies faculty to student ratio of 1:26 for doctoral institutions and 1:24 for regional institutions. Details for the Instructional Multiplier Calculation and the General Studies salaries can be found on pages C-6 & C-7.
2. Instruction: The most current (AY 2018-2019) annual actual campus weighted semester credit hours applied to the instructional multiplier. The instructional multiplier for Doctoral institutions is 137.25. The instructional multiplier for Nondocular institutions is 122.99. Remedial credit hours receive an additional 115% increment. The Weight Table can be found on pages C-4 & C-5.
3. Instructional Related Support: 30% of the amount generated for instruction.
4. Research: For Doctoral institutions 10% of Instruction and Instructional Related Support plus 30% of qualifying 2017-2018 Sponsored Research. For Nondocular institutions 2% of Instruction and Instructional Related Support plus 30% of qualifying 2017-2018 Sponsored Research.
5. Public Service: For Doctoral institutions 2% of Instruction and Instructional Related Support and for Nondocular institutions 10% of Instruction and Instructional Related Support.
6. Library Support: Actual unweighted semester credit hours (except military science) corresponding to the weighted credit hour value multiplied by the following cost factors:

Undergraduate	\$13.78
Graduate I (Masters)	27.88
Graduate II (Doctoral)	119.42
Law	73.65

7. Technology Support: 15% of Instruction plus Instructional Related Support plus Library Support.

8. Tuition Adjustment: An average credit hour charge is calculated, using AY 2019-20 tuition and required fees and AY 2018-2019 annual unweighted credit hours for each institution. Ninety percent (90%) of that rate is multiplied by the unweighted credit hours (excluding Military Science) for each institution.

9. Facilities Renewal Allowance: The Facilities Renewal Allowance is calculated from a detailed formula based on the square footage of physical space, construction, age and use (office, classroom, lab, etc.). Nationally estimated engineering rates for renovation and replacement are used to determine the costs factors. All of the Annual Renewal Allowance calculation plus 25% of the Cumulative Renewal Allowance calculation minus the amounts for auxiliary and other space is included.

10. Fringe Benefits: Social Security (or FICA), and Retirement (TRSA), and PEEHIP (Health Insurance), are included at the reported actual expenditures of the previous year.

All of these needs, in composite, are referred to as the ACHE Standard Calculation.

Notes:

- A. Multiplier equals Region IV inflation-adjusted salary divided by productivity of 630 semester credit hours for doctoral institutions.
- B. Multiplier applied to nondoctoral is weighted by the ratio of CUPA to NASULGC national salaries times the ratio of doctoral productivity (630 SCH) to nondoctoral productivity (585 SCH).
- C. Multipliers are based on salaries two years prior to formula year, adjusted for inflation.

Community College Funding Needs
Alabama Public Institutions
Fiscal Year 2020-2021

The funding rate per FTE student of the Southern Regional Education Board (SREB) states is calculated. The rate is multiplied by the Alabama Community College Fall FTE enrollment to produce a total which approximates the amount funded at the average of the SREB states.

STATE	APPROPRIATIONS	FTE ENROLLMENT	\$/FTE
ALABAMA	285,847,025	56,626	5,048
ARKANSAS	177,811,717	30,992	5,737

W/O ALABAMA			4,068

2017-18 FTE SREB Data was used for Delaware & Maryland.

2017-18 Appropriation SREB Data was used for Kentucky, North Carolina, South Carolina & Texas.
Source: SREB Data Exchange, 2018-2019 (preliminary data).

Technical Colleges Funding Needs
Alabama Public Institutions
Fiscal Year 2020-2021

Total funding needs for the Alabama technical colleges are estimated by calculating the average salary (9 months) for technical college faculty, applying a standard student: faculty ratio (15:1) to determine instructional salary expense per student FTE, and multiplying this rate by the Fall FTE enrollment.

AVERAGE FACULTY SALARY 2018-2019	52,344
INFLATION FACTOR 1.036	54,245
ADJUSTED EXP PER FULL-TIME STUDENT	3,616

Facilities Renewal Requirements

Basis of Estimates:

In its Consolidated Budget Recommendations for the last several budget years, the Alabama Commission on Higher Education included funding, to be provided from nonrecurring revenues, for the renewal of facilities. The amount recommended for each institution is an estimate of the amount of money needed to provide for the aging of all building elements in a given year.

The method used by the Commission staff to estimate facilities renewal needs is not as precise as a carefully prepared engineering estimate based on detailed facilities inspections. However, until each institution has thoroughly documented its entire requirement for repair and renovation, a detailed engineering estimate cannot be prepared and the process followed by the staff provides a consistent and realistic estimate of needs.

The rationale behind the process is as follows:

- (1) The incidence of major repair and the need for general renovation of a building increase with its age, and the relationship is generally skewed toward the older, unrenovated facilities.
- (2) Different elements of a building wear out or become obsolete at different ages. For example, foundations and principal elements of the superstructure are essentially permanent. Exterior walls, plumbing, and lighting have expected life of 40 to 50 years. Roofs and air conditioning should last 20 to 25 years. Interior surfaces require reworking in 10 years or less.
- (3) Different types of buildings, even though constructed to similar standards of quality and of similar materials, are comprised of different combinations ("mixes") of elements, and the cost of replacing or renovating each type depends on the mix and the cost per square foot of each element.
- (4) The "renewal allowance" of a building is defined as the amount that should be budgeted in any year to provide for the aging of all elements of that building. The "renewal backlog" of a building is defined as the summation of all the years' renewal allowances to date, for that building, from its initial completion (or latest complete renovation) and is a measure of the total amount that should be spent to bring the building to essentially new condition. The renewal allowances and backlogs are estimated by multiplying the sums of maximum renewal costs for each 25-year and 50-year element by factors reflecting the age of the building elements.

Attachment 1 summarizes maximum renewal costs, at 2019 construction cost levels, for 50-year and 25-year elements, for different types of college and university buildings, derived from the 2019 Means Square Foot Costs. These construction costs were then adjusted using a regional cost factor of .80. Elements normally requiring reworking or replacement in less than 20 to 25 years (e.g. wall finishes) are not included in renewal costs, on the basis that these elements are dealt with in the course of regular maintenance.

Procedure for Calculating Renewal Allowances and Backlogs

Renewal Allowances and Renewal Backlogs are calculated as follows:

(1) Calculate the current replacement value of each 50-year and 25-year element of each major campus building according to Attachment 1 and determine the Maximum Renewal Allowance for each facility as follows:

(a) 50-year Elements: Maximum Renewal Allowance is the sum of the current replacement costs of 50-year elements.

(b) 25-year Elements: Maximum Renewal Allowance is the sum of the current replacement costs of the 25-year elements.

(2) Calculate the "adjusted age" of the 50-year and 25-year elements for each building that has undergone renovation since its construction (up to 50 and 25 years respectively), as follows:

(a) 50-year Elements - Multiply the proportion of the building area renovated by the time elapsed since each renovation. Multiply the proportion not renovated (i.e. one minus the proportion renovated) by the age of the building up to and including 50 years. The sum of the two (or more) products equals the adjusted age of the 50-year elements.

(b) 25-year Elements - Multiply the proportion of the building area renovated by the time elapsed since each renovation. Multiply the proportion not renovated by the age of the building, up to and including 25 years. The sum of the two (or more) products equals the adjusted age of the 25-year elements.

(3) Calculate the current year Renewal Allowance for each facility as follows:

(a) 50-year Elements - Divide the building age (actual or adjusted), up to and including 50 years, by 1,275 (the sum of the years digits from 1 to 50). Multiply the quotient by the Maximum Renewal Allowance for 50-year elements and this product by the gross building area.

(b) 25-year Elements - Divide the building age (actual or adjusted), up to and including 25 years, by 325 (the sum of the years digits from 1 to 25). Multiply the quotient by the Maximum Renewal Allowance for 25-year elements and this product by the gross building area.

(c) Add products (a) and (b).

(4) Calculate a 50-year element renewal factor and a 25-year renewal factor for each facility as follows:

(a) 50-year Elements - Sum the numbers from 1 to the current (actual or adjusted) age of the building (up to 50 years) and divide by 1,275.

$$F_{50} = \frac{1 + 2 + 3 + \dots + \text{Current Age}}{1 + 2 + 3 + \dots + 49 + 50}$$

(b) 25-year Elements - Sum the numbers from 1 to the current (actual or adjusted) age of the building (up to 25 years) and divide by 325.

$$F_{25} = \frac{1 + 2 + 3 + \dots + \text{Current Age}}{1 + 2 + 3 + \dots + 24 + 25}$$

(5) Calculate the Renewal Backlog for each building as follows:

Renewal Backlog = (50-year renewal factor) x (50-year Maximum Renewal Allowance) + (25-year renewal factor) x (25-year Maximum Renewal Allowance).

(6) Sum the calculated current year Renewal Allowances and Renewal Backlogs for all campus facilities broken down by funding category (e.g. E&G, Auxiliary, Health Professions, etc.). The sum of the Renewal Backlogs represents current total renovation backlog. The sum of the current year Renewal Allowances will be the amount that should be appropriated for facility renewal for the current year.

Attachment 2 summarizes Renewal Allowances and Renewal Backlogs for all Alabama public postsecondary institutions of higher education, based on the Fall 2019 Facility Inventory and 2019 construction cost data.
